Abstract

Focus on Nutrition – Research funding of German-African Consortia

With the funding instrument “Research Cooperation for Global Food Security and Nutrition” the Federal Ministry of Food and Agriculture (BMEL) strengthens the contribution of Germany’s agricultural and nutritional research to the development of an efficient food system in partner countries, by building long-term partnerships between agricultural and nutritional research institutions in Germany, Africa and Southeast Asia.

Two calls for proposals have been published since 2013 focusing on diversified agriculture for nutrition-sensitive food production and on improved processing of local food to reduce seasonal food insecurity as well as food and nutrient losses. In this context, twelve consortium projects will be funded by the end of 2017.

Funding agency is BLE.

The BMEL-Session (6B) at the Tropentag 2017 presents a variety of the consortia and their projects funded within the frame of the first call on “Diversified Agriculture for a Balanced Nutrition”:

1. Diversifying agriculture for balanced nutrition through fruits and vegetables in multi-storey cropping systems (NutriHAF), coordinator: The Center for Development Research (ZEF).
5. Agriculture and Dietary Diversity in Africa (ADDA), coordinator: Georg-August-Universität Göttingen.

Keywords: Climate change, diversification, nutrition-sensitive agriculture, research cooperation, sub-Saharan Africa
