The first expert network for food and non-food biomass in Africa

**Goals**
- Connects all stakeholders in a virtual environment
- Enhances knowledge exchange through a toolbox, including publications, policy briefs, data and software
- Enables information exchange and dissemination
- Promotes biomass production, processing and trading in Africa to enhance food security and support knowledge-based bio-economies
- Enhances system thinking and innovation in the African biomass sector

**Background**
- Value web approach
- Value webs are complex systems of interlinked value chains
- Transdisciplinary research project for food security and bioeconomies in Africa

**Features**
- Online platform
- Meet groups & events
- Create an open space for networking and personal exchange
- Facilitates moderated e-mail discussions amongst members
- > 400 active Members from > 50 countries

**BiomassNet Dgroup**
- Connects all stakeholders in a virtual environment
- Enhances knowledge exchange through a toolbox, including publications, policy briefs, data and software

**Meetings & events**
- First networking events in Bonn, Germany and Accra, Ghana

**Practice**
- Policy
- Science
- Target groups

**Join now** www.biomassnet.org
