“Development on the margin”

Canadian Migration

RODNEY GNANAMANY

Asset Gold (PVT) Ltd, Migration, Sri Lanka

Abstract

Comprehensive Look at Asset Gold

Migration has been a continuous and hot topic in Sri Lanka . Scores of Sri Lankan leave the shores of their motherland armed with bundles of hopes that the grass is greener on the other side with aspirations of becoming somebody. Though there are a number of those who realise their dreams amidst all odds, there are several unsuspecting Sri Lankan who get hoodwinked by unscrupulous agents or so called consultants leaving them utterly disillusioned about their dream of reaching greener pastures. We are trying our best to prove that all consultants are not rogues. My advice is Fear of failure is often worse than failure itself. Be prepared with you qualifications and experience because pressure comes from being unprepared.

There a philosophy that has guided me and seen me through life's trials and tribulations?

I strongly believe that success is measured in the problems we overcome to get there. And there people who sometime lie to clients to overcome a problem, but my point of view is, a lie may take care of the present but it as no future. I never work for money, its quality and customer service first and then money simply follows. I always take risk because when a person risks nothing, he does nothing; he has nothing and is nothing.

Final thoughts.

There are many people going to Canada , because it is a multicultural society and the many prospects there. There is freedom to keep your identity, in terms of race religion or even food, which has made Canada the preferred destination. Whatever your reasons may be, if you are looking to migrate and seeking assistance you must look for a migration consultant. In the market, there are many people involved but professional migration consultants should be the way to go.
