

## *Improvement of the sesame value chaine by introducing a sesame processing unit in Bobo-Dioulasso/Burkina Faso*

OUEDRAOGO T. Maggy, Entrepreneur, Burkina Faso

### Introduction

Sesame is one of the oldest oilseed crops. In Burkina Faso it is the third export product but only 1% the production is consumed in Burkina Faso due to:

- ❖ Low processing capacity
- ❖ Low level of organization...

The solutions approach are to process the sesame instead selling the raw material and to create a close systeme by using renewable energie and use the production vaste for animal feeding .

### Implementation steps

- ✓ Business planification;
- ✓ Solve the financial issue;
- ✓ Get official documentation;
- ✓ Find parteners;
- ✓ Start the business.

#### Project idea

Set up a sesame processing unit

Collect sesame from standardizes groups

Process it (clean and press)

Sell it to wholesaler and retailer

### Conclusion

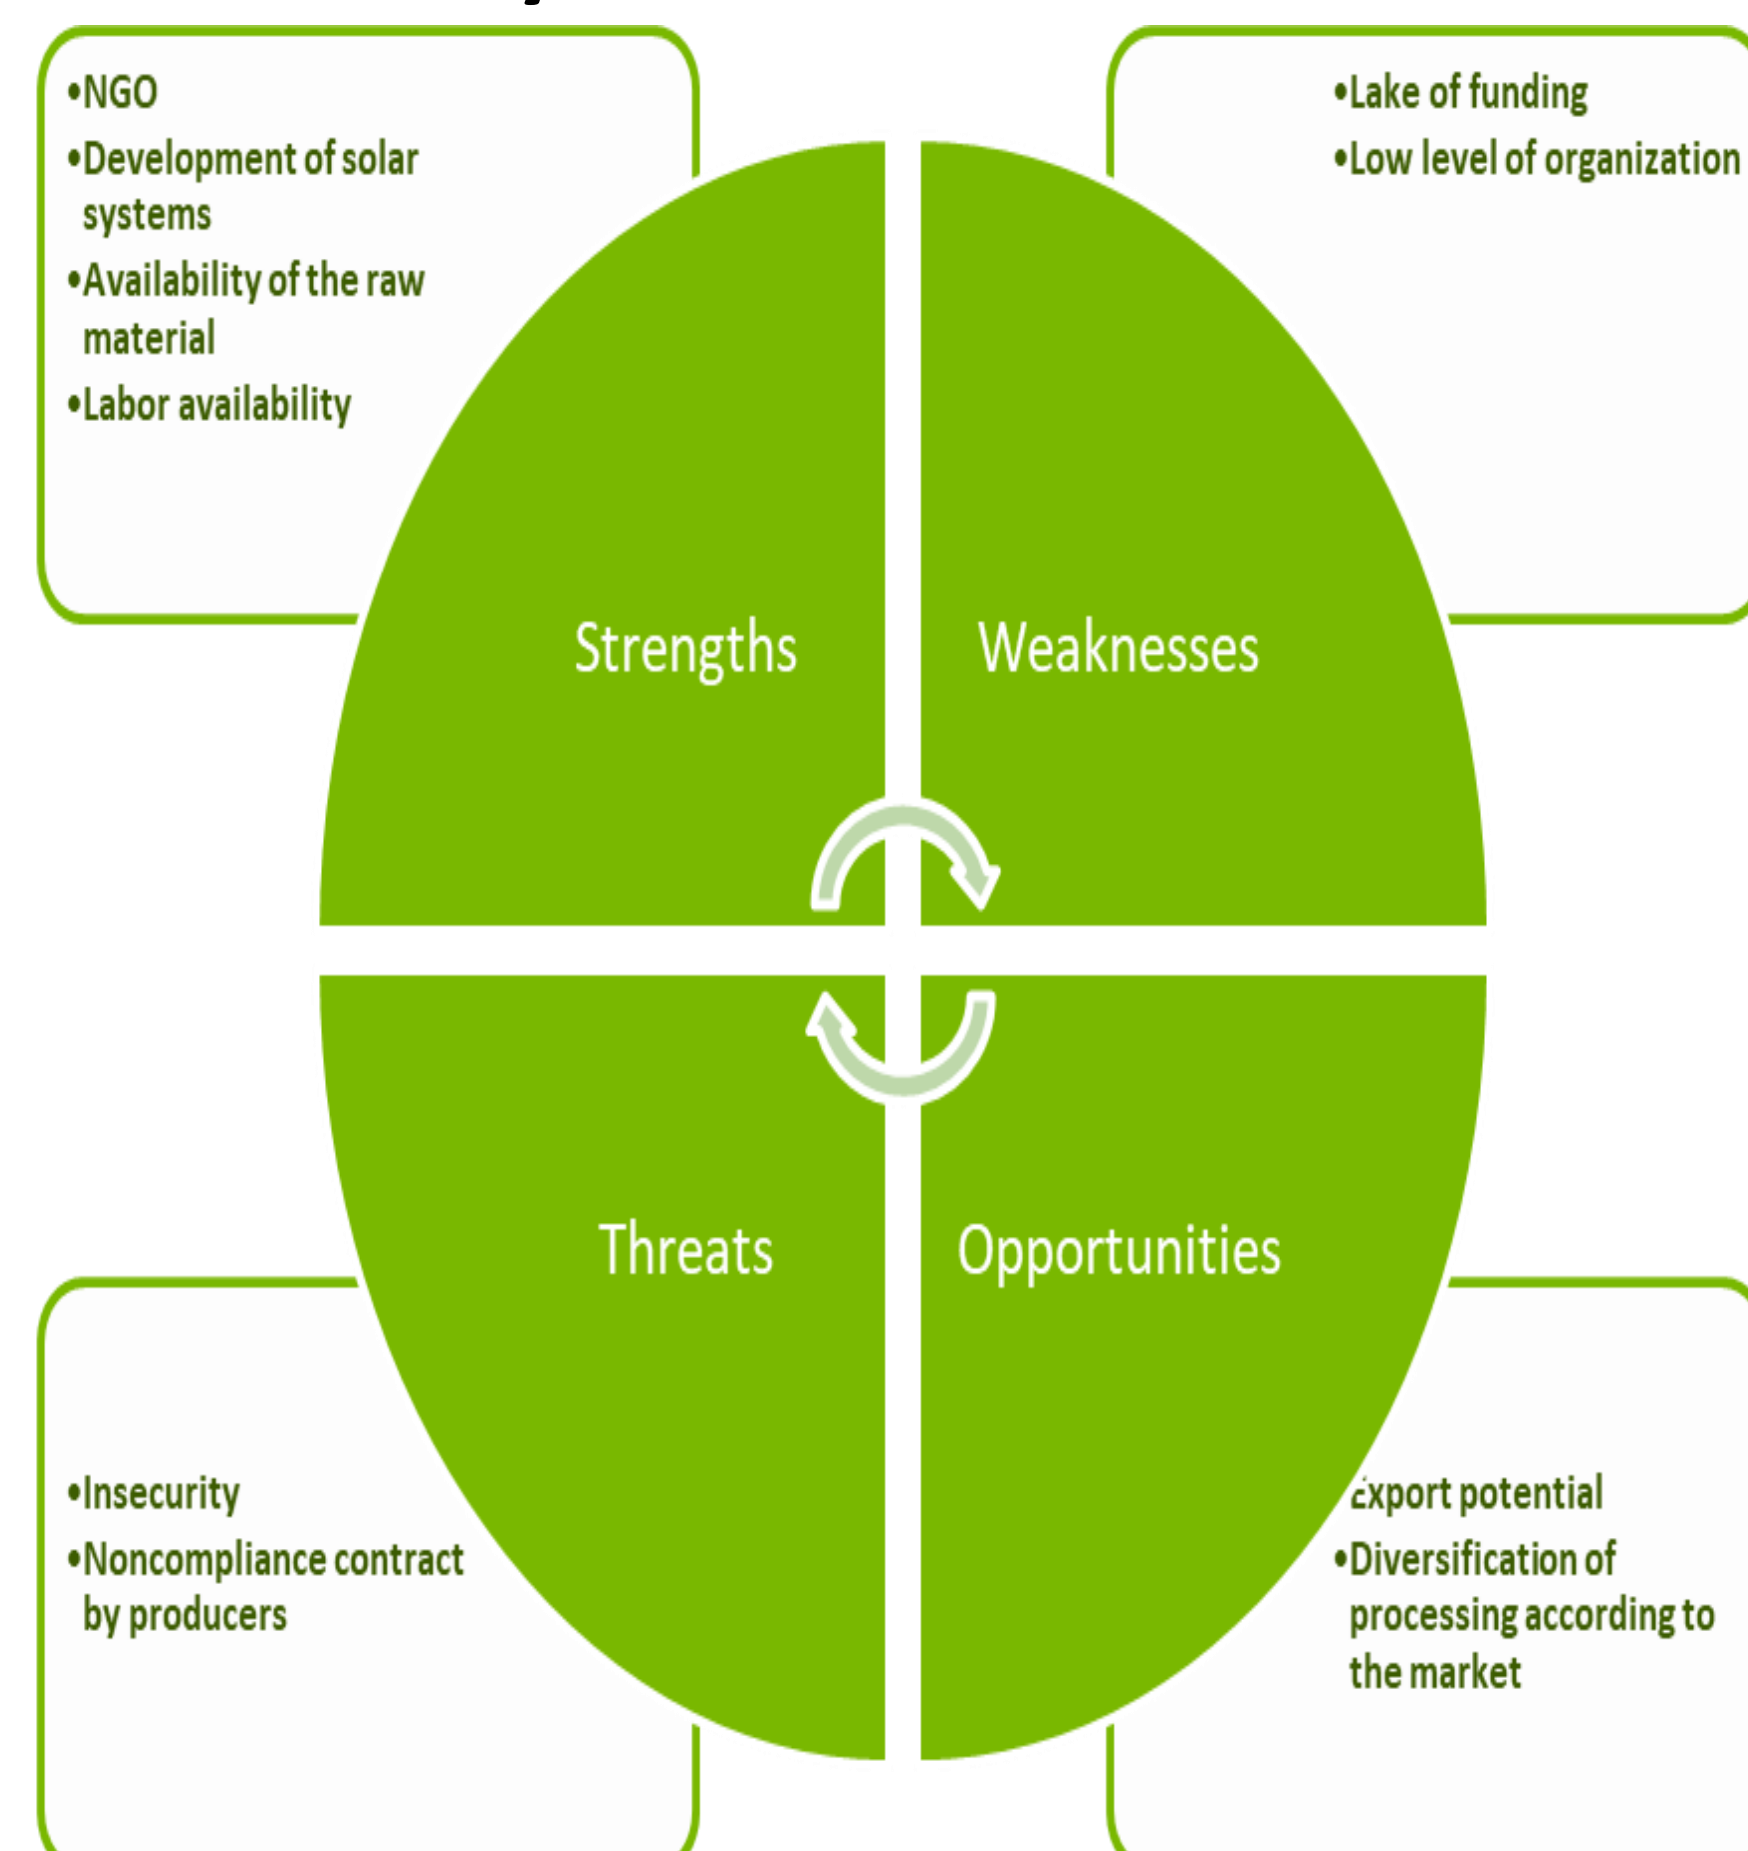

The transformation of sesame is marginal in Burkina Faso and remains mainly artisanal. The mains transformations carried out locally at this time day are: the production of oil from sesame and making cookies of sesame.

An appropriate processing and packaging will create more value and jobs especially for women. Use the waste for animal feeding will also create income or outlook for the future company.

### Expected costs (Euro)

commodity	prices
machine	15 000
Raw material	500
Production	800
<b>Total</b>	<b>16 300</b>

#### SWOT analysis

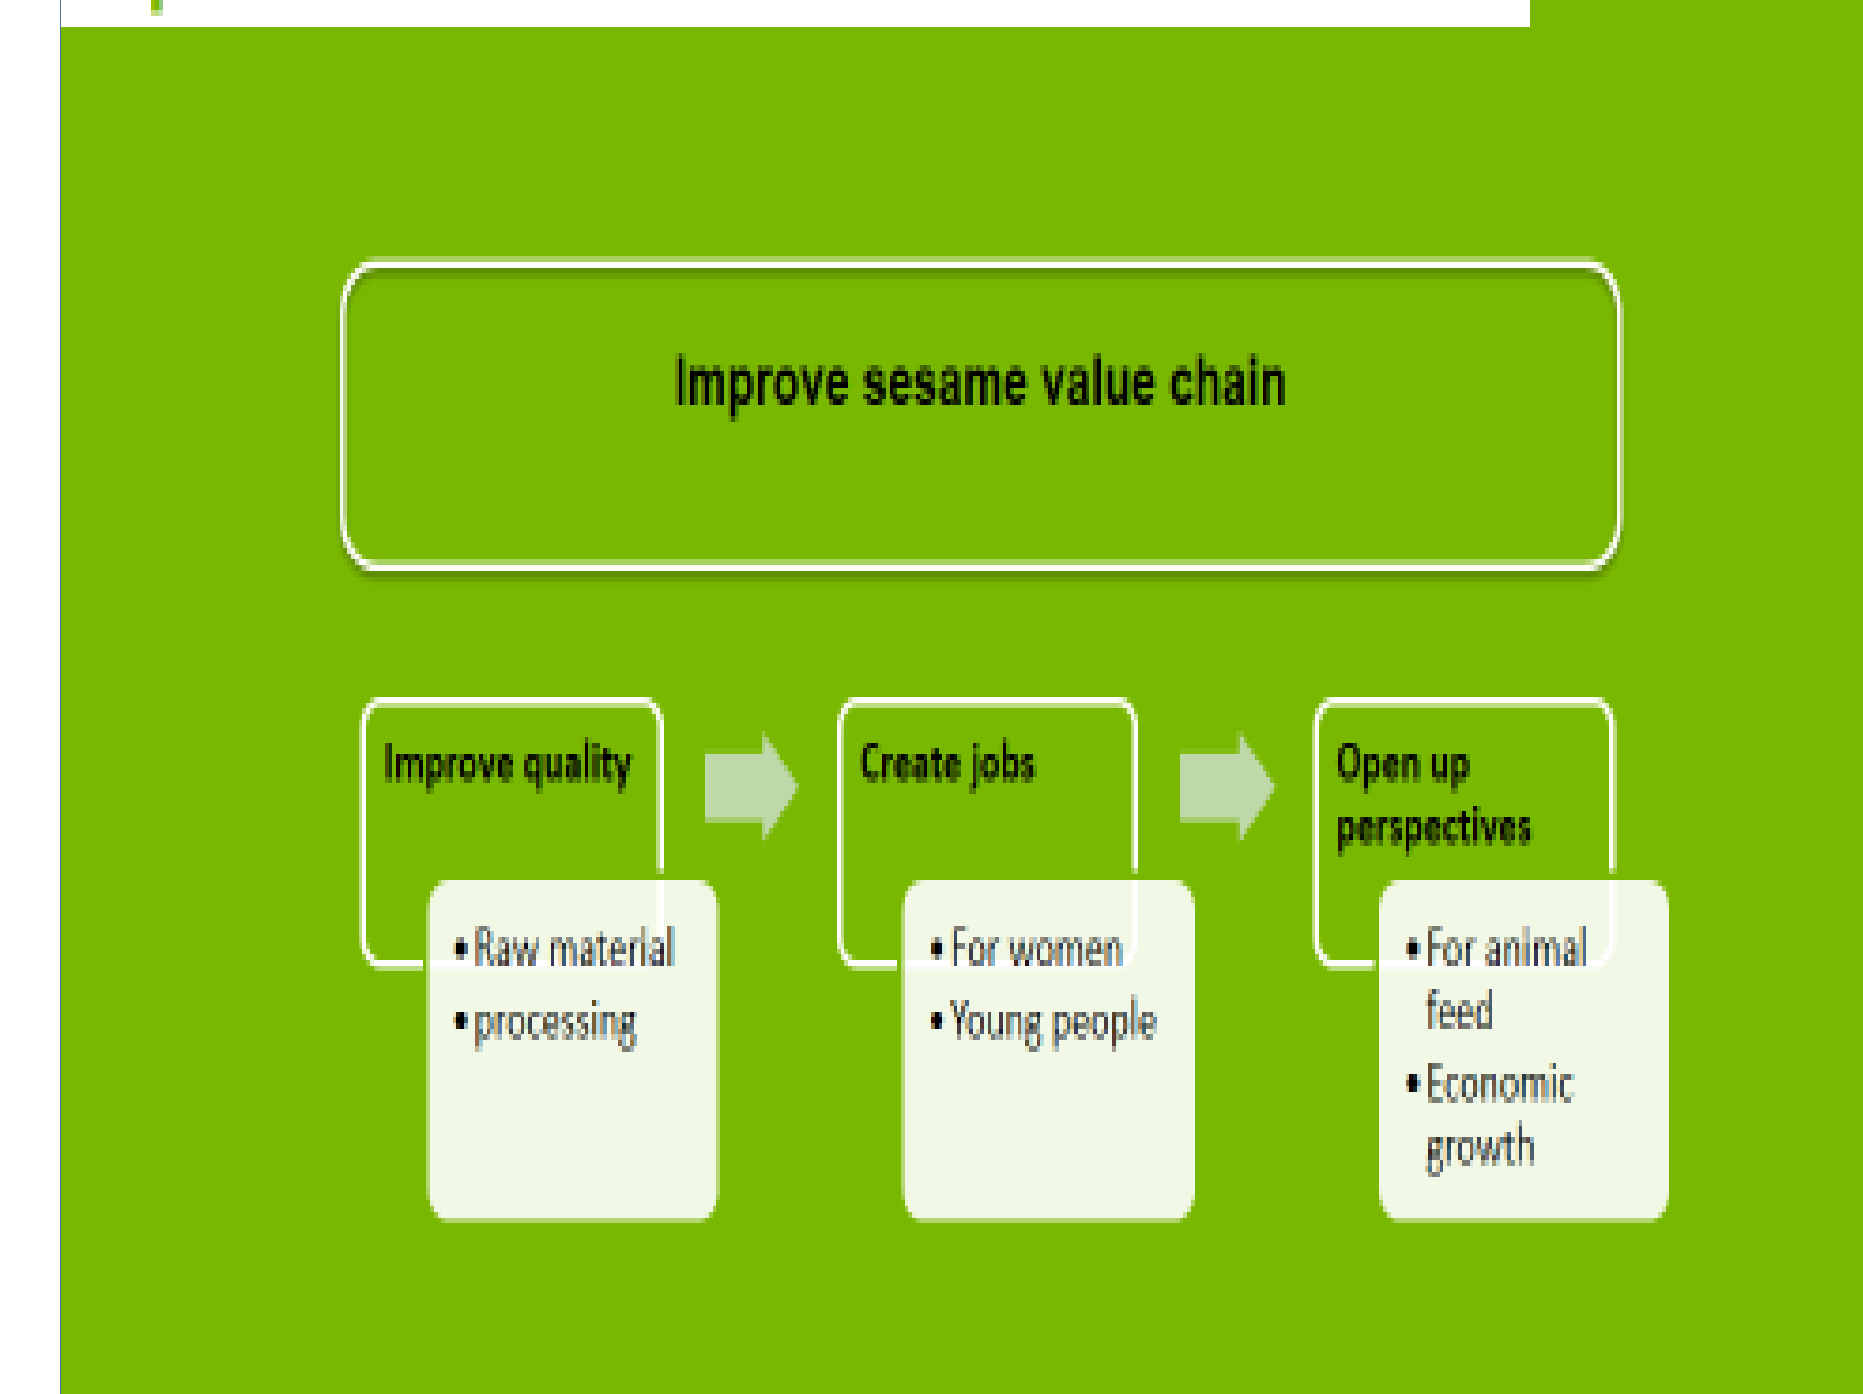

### Benefits of the sesame oil

- Rich in antioxidants
- Good source of fiber
- Good for skin
- Good for heart
- Has strong anti-inflammatory properties

### Expected outcomes
