

Fruit Tree Growing Program to Increase Nutrition and Livelihood Development among Rural Households in Zambia

Gift Chitambala
Westwood Agri Limited

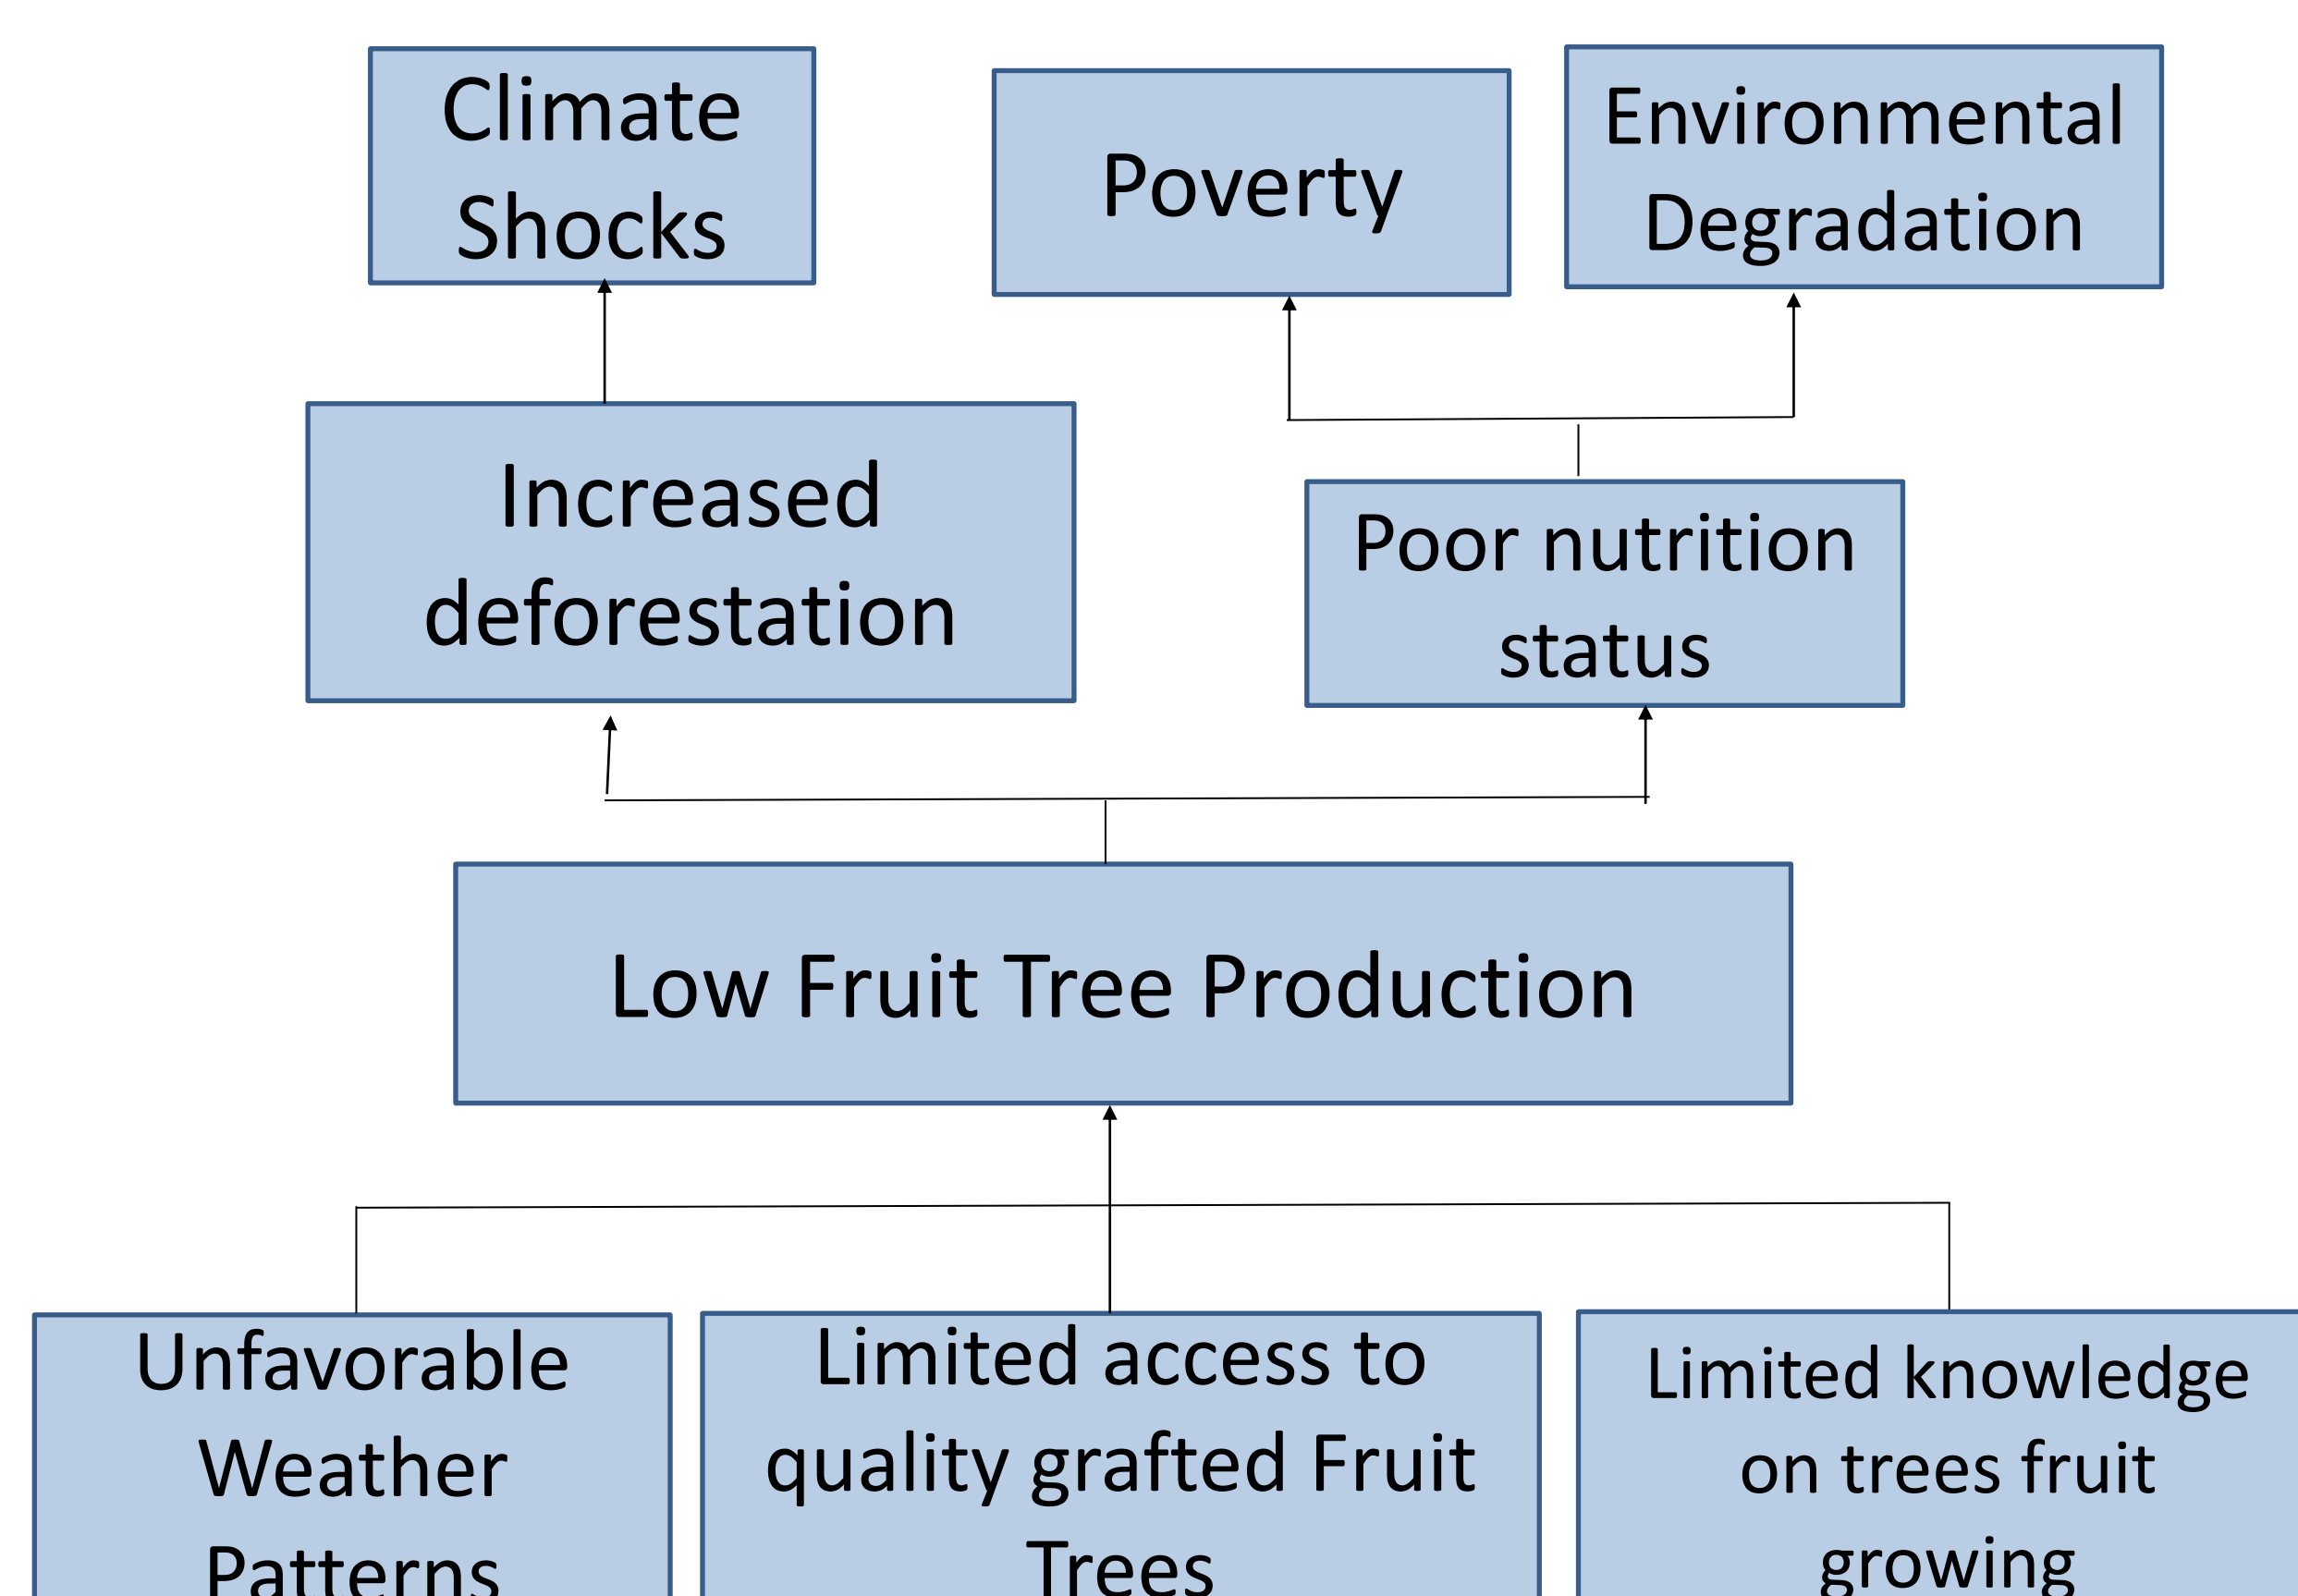

Introduction

- This project will aim to promote household level fruit production and value addition so as to provide a source of nutrition, income generation and environmental conservation among households that the project will target. The project will train 1000 participants on propagation and management of high value grafted fruit trees.

Objective(s)

- To promote household fruit production.
- To promote household nutritional status.
- To promote income generation opportunities.
- To promote environmental conservation.

Problem tree
